

*FUND RAISER  
FOR  
SABRINA THAXTON – MINTER*

Sabrina has a terminal kidney disease, Bilateral Medullary Nephrocalcinosis. The money raised will be to get her to a diagnostic hospital that specializes in the kidneys to find the underlying cause that is turning her kidneys and joints to stone. It is progressing at an alarming rate and this step is necessary to save her life. We do have insurance, but need help with the co-pays and deductible to be expected into the hospital. Travel expenses are also needed for us to get her there and help cover loss of work, prescriptions, and medical equipment.
